- Developed AI-powered travel app with Flutter/Firebase, optimizing UI and cutting API/database costs using Provider state management.
- Integrated OpenWeatherMap API for real-time weather and added scheduled notifications.
- Implemented multilingual support in 10 languages and integrated Microsoft Translator API for AI communication..

Freelance Flutter Developer – Remote (07/2024 – Present)

- Built custom mobile applications for websites and personal projects.
- Integrated Firebase for real-time database and authentication services.
- Developed apps with clean architecture and optimized performance

Intern Computer Engineer(Software)– Belsoft Bilişim | Gaziantep, Turkey (07/2024 – 08/2025)

- Assisted in software development and testing processes.
- Supported integration of Flutter-based modules into existing systems

Freelance Website Manager – Blog & E-Commerce | Isparta, Turkey (10/2023 – 01/2025)

- Managed and customized WordPress-based websites and edited e-commerce sites via admin panels according to client needs.
- Improved user experience, increasing website traffic by 20%.

Website Manager – Gelirpazar.com | Konya, Turkey (08/2023 – 01/2024)

- Led a small team for website design, content updates, and maintenance.
- Improved site speed and optimized product listing pages.

IT Technician – Süleyman Demirel University | Isparta, Turkey (04/2023 – 05/2023)

- Provided technical support for faculty and staff.
- Resolved hardware and network issues in a timely manner.

Education

Computer Engineering – Süleyman Demirel University | Isparta, Turkey (09/2020 – 08/2025)

Additional Information

- Open to relocation and remote work opportunities.
- Actively learning advanced AI integration techniques in mobile application
- I am a team player with strong analytical thinking and communication skills.s.

Projects

Wallet App – Flutter, Figma, Docker, Company API

- Developed a wallet application using company-provided APIs for all functionalities, including user registration, login, transaction history listing, detailed transaction views, balance display, and multi-account management. Utilized Postman to facilitate API usage and testing. Successfully implemented Figma designs into the app, ensuring a seamless and user-friendly interface.

AI-Powered Travel Assistant App – Flutter, Firebase, AI API

- "Developed and optimized an AI-powered travel assistant application, enhancing UI design and reducing API and database costs through state management with Provider. Integrated OpenWeatherMap API to deliver real-time, hourly, and weekly weather updates with notifications. Implemented multilingual support in 10 languages and integrated Microsoft Translator API for AI communication. Added scheduled notification functionality to improve user engagement."

Pet Adoption App – Flutter, Firebase

- Developed a pet adoption mobile application featuring notifications, messaging, listing search, user profiles, and ad posting; optimized performance and reduced database costs through state management and Provider.
